

DAY 1

I am in love with
my new eyebrows!

DAY 2-4

My brows feel too dark
and bold, my skin looks
a little red and irritated.

DAY 5-7

My brows are
starting to flake and
its freaking me out!

DAY 8-10

My brows are
disappearing, they look
light and inconsistent.

DAY 14-28

Yay! My brows
are coming back,
color is reappearing!

AFTER TOUCH UP

Now that I have had my
touch up my brows are as
dark and saturated as desired!

Eyebrow after care instructions

Thank you for trusting an ÍZORA artist with enhancing your eyebrows. Your final healed results after both sessions lasts 1-3 years on average. Please carefully read and follow instructions provided below.

FOLLOW THESE INSTRUCTIONS FOR 10-14 DAYS:

- Apply balm as instructed by your artist. On average 2 times a day, once in the morning and once in the evening. Use about the size of a pea and always apply with a q-tip, never with fingers.
- Before each new layer of healing balm applied, remove the old layer by taking a wet Q-tip or damp paper towel with water only and gently wipe over eyebrows. Pat dry, then apply new layer of healing balm.
- Do not get brows saturated with water as this may pull pigment out.
- Avoid heat and steam as this may also effect healed results.
- Avoid direct sunlight while brows are healing and once healed apply a tattoo safe SPF when exposed to sunlight to prevent color fading. Tanning beds will fade brows quickly.
- Avoid makeup or skincare products on top of or too close to brows.
- If scabs appear, do not pick or scratch at them as this will effect healed results.
- Avoid sweating for duration of healing process.
- Avoid touching area with fingers
- Book your touch up session within 6-12 weeks, even if color looks great, it is still recommended for best results.
- Avoid putting anti-aging or exfoliating products directly on brow area.
- Once area is healed after 10-14 days, you may apply makeup to brow area as desired.
- Color-boosts are recommended once brows are 50% faded within 1-3 years.
- Thank you for reading and happy healing!
