

**DAY 1**

My lips look swollen,  
too dark and exaggerated.

**DAY 2-4**

The swelling is going  
away and each day my lips  
are getting softer in color.

**DAY 5-7**

My lips look beautifully  
blushed and I love the color.

**DAY 8-14**

The color continues to settle  
in and becomes more natural.

**AFTER TOUCH UP**

After having two full sessions  
my lips have beautiful color!

Note: Lips with hyper-pigmentation may need additional touch up sessions to achieve desired results.

## *lip blushing after care instructions*

Thank you for trusting an IZORA artist with enhancing your lips. Your final healed results after both sessions lasts 1-3 years on average. If you are prone to getting cold sores please take preventative medication 3 days before appointment, day of appointment and 3 days after appointment. Please carefully read and follow instructions provided below.

### **FOLLOW THESE INSTRUCTIONS FOR 5-7 DAYS:**

- Apply healing balm constantly while lips are healing. Always apply with a Q-tip. It is important to keep lips hydrated 24/7 while healing.
- Avoid picking any dry skin off of lips.
- Use a damp paper towel to blot over lips 2-3 times a day.
- Avoid applying any lipsticks or lip balms.
- Drink beverages through a straw.
- Avoid direct sun exposure for 7 days. When in sunlight for multiple hours at a time, using a SPF lip balm is recommended.
- Avoid spicy foods or foods that will require you to use a wide bite such as sandwiches.
- Avoid touching the area with fingers.
- If cold sores develop during healing process please notify artist.
